Java

```java
class Solution {
    public int equalPairs(int[][] grid) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number[][]} grid
 * @return {number}
 */
var equalPairs = function(grid) {

};
```

C++

```cpp
class Solution {
public:
    int equalPairs(vector<vector<int>>& grid) {

    }
};
```

C#

```csharp
public class Solution {
    public int EqualPairs(int[][] grid) {

    }
}
```
